

Our Doctors

John Vukich, M.D.
Cataract and Refractive Surgeon

Dr. John Vukich is a Board Certified Eye Surgeon and Fellow of the American Academy of Ophthalmology. He has extensive experience, specializing in refractive cataract surgery, presbyopia treatment, Microinvasive Glaucoma surgery (MIGS), and collamer lens surgery with the EVO ICL. Dr. Vukich has been widely recognized and awarded for his skill as an Ophthalmologist as well as his dedication to patient care.

Nicholas Bruns, O.D.
Optometrist

Dr. Nick Bruns specialty is pre- and post-operative care as well as specialized care for glaucoma, cataracts, and ocular pathology. Dr. Bruns routinely manages complex surgical cases and is versed in the latest advanced technology IOLs and cutting-edge vision correction technologies.

Mark Mlsna, O.D.
Optometrist

Dr. Mark Mlsna has been practicing state-of-the-art eye care in Southeastern Wisconsin for more than 19 years. Dr. Mlsna has created a thriving practice that provides comprehensive eye care for his patients, including eye exams, glaucoma management, diabetic eye care, macular degeneration, and other ocular diseases and conditions as well as post-operative eye care.

Dana Webb, O.D.
Optometrist

Dr. Dana Webb has extensive experience in evaluating patients with ocular disease, as well as providing pre and post-operative care, contact lens assessments, and enjoys challenging eyeglass prescriptions. Dr. Webb loves getting to know her patients and provides thorough personalized care.

About Summit Eye Care

Milwaukee's Leading Providers of Cataract Surgery

The highly experienced eye doctors at Summit Eye Care are committed to providing high-quality vision care. We are passionate about improving vision in the Milwaukee area by combining the most advanced cataract surgery options available with personalized patient care. We specialize in refractive cataract eye surgery options in addition to routine cataract surgery. Our collaborative relationships with many local optometry practices allow us to provide comprehensive and consistent patient care.

Services

Cataract Surgery

Cataracts can cause blurred vision, trouble seeing at night, and vision loss. At a certain point, cataract surgery is the only effective treatment to restore vision. Summit Eye Care is a leader in cataract surgery and Dr. Vukich has performed over 22,000 cataract surgeries. We work closely with patients and their local eye doctor to create a personalized cataract surgery treatment plan.

Advanced Intraocular Lenses

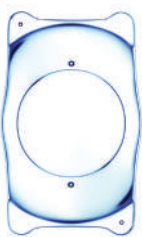

In addition to standard IOLs, we offer a full range of advanced IOLs to correct vision at multiple distances and reduce or eliminate the need for glasses after cataract surgery. We offer Multifocal Lenses, Extended Depth of Focus (EDOF) Lenses, and Toric Lenses to correct astigmatism.

RxSight Light Adjustable Lens

Summit Eye Care is the first and only practice in Wisconsin to offer the RxSight Light Adjustable Lens. This unique IOL can be adjusted with postoperative UV light treatments after surgery in order to provide customized vision correction.

EVO ICL

EVO ICL, also known as Implantable Collamer® Lens, can correct common refractive errors such as astigmatism and myopia. This additive technology offers vision correction that is reversible and has a high patient satisfaction rate. EVO ICL may be an option for patients who are not candidates for LASIK and other procedures.

Summit Eye Care's Commitment to the Care of Patients

Our team is honored to work collaboratively with many outstanding local eye doctors. We respect the relationship that referring providers have with their patients and we aim to optimize the patient experience through communication and high-quality surgical care for cataract surgery and ICL surgery.

At Summit Eye, our experienced eye doctors are dedicated to providing high-quality vision care, specializing in cataract treatment, refractive lens exchange and ICL surgery.
